

Recommendation for Gene.

This recommendation about Gene Garrett of Manufacturers in China is made with highest regards for his professional knowledge of the manufacturing business in the international market and all the constituents thereof. Including but not limited to the sourcing of the manufacturers, the development of prototypes, the production, the shipping, the marketing, the graphics ,as well as assisting with his knowledge of how products are manufactured and what can and can't be done in manufacturing. He provided me with his invaluable resources and knowledge of the China market far above what I could have expected from a large sourcing agency. The one on one relationship has developed into a friendship and a blessing for my business and my new invention, the Crapper Zapper. Gene treats my invention and needs as if they were his own by offering me all of his knowledge that I need. He is honest, sincere, determined, and dedicated to his clients for the best interests are his highest priority. I was fortunate enough to accompany Gene on my sourcing project and I witnessed first hand his professional and knowledgeable manner in dealing with the manufacturers in China. This was priceless. I learned things I never knew I was going have to know. My savings by allowing him to assist me with my invention all the way to the retail market place is extremely large. The cost of a mistake on this level could be devastating to a beginning business, possibly exhausting operating capital and delaying the project. Gene was a Godsend to me, I have limited capital and could not afford a mistake. When one considers the costs they must include the value of knowledge in preventing mistakes, and it's value in getting the product to the market place in a more timely fashion than the under knowledgeable approach. The professional manner in which Gene conducts his business and the knowledge he offers are invaluable to anyone seeding Chinese manufacturing or sourcing in the Asian market. Gene has the understanding of how it all works. His talents and skills make him the only wise choice for all of your sourcing needs. Thanks to Gene Garrett of Manufacturers In China for his continuing efforts to bring the Crapper Zapper to all the major retail outlets in the U.S.A. and the international market. Crapper Zapper.
